Perfect Lighting FOR PICTURES

Frink's Special Patent Reflectors have been adopted by the leading collectors and galleries as the only method of perfectly lighting pictures. These reflectors are made of silver-plated corrugated glass, set in metal frames. As the designs are on thoroughly scientific lines, satisfactory illumination is the result. This important matter has had our careful study for years and has brought us recognition as experts. If you have a gallery or single painting to light, send dimensions and other data and we will gladly submit suggestions and estimate.
